EXPERIENCE

Priders.net, Austin TX — *MERN full-stack developer*

JAN 2020 - PRESENT

Priders.net is a forum based social media app I single-handedly built with my deep understanding of technologies such as React, Nodejs, ExpressJs, Mongodb, AWS, ReactQuery, Socket.io and more... I have the experience of building a mature social-network web app from scratch to production. Priders.net is officially launched on 10/06/2022, and now has over 200 registered users and over 50 active users.

Who Am I?

I am a goal-oriented, hard-working developer who is always striving for progress, perfection and efficiency. I have a wide range of expertise in web development technologies because I never stop learning new skills. I love to build personal projects with different technologies to further strengthen my ability to build beautiful, fast websites.

PROJECTS

Priders.net — www.priders.net

Priders.net is a forum based social media app built for the LGBTQIA2S+ community. It is a real world project that guarantees high-level security, fast performance, scalable and lightweight beautiful looking UI that takes serious consideration into the user experience. It is built with different technologies with best practices.

Cheap & Yummy — <https://cheap-and-yummy.vercel.app>

This app utilizes data from Yelp Fusion API and Google Map API. It is built with the newest technologies featuring Nextjs 13 App router, Typescript, Zustand, TailwindCSS, React-Query, etc.
